	<p>You fetch recent notifications from your database (via API) when the bell is clicked.</p> <p>Or you load them on page load and just toggle visibility of the dropdown.</p> <p>You mark them as read (optional) when the dropdown is opened or when each one is clicked.</p> <p>You can use:</p> <p>React state to toggle the dropdown</p> <p>Tailwind + Headless UI for the UI</p> <p>Prisma + Next.js API routes to fetch/store notifications</p> <p>You fetch recent notifications from your database (via API) when the bell is clicked.</p>
--	--

Request Reason

Type	Reason
------	--------

Or you load them on page load and just toggle visibility of the dropdown.

You mark them as read (optional) when the dropdown is opened or when each one is clicked.

You can use:

`useState` React state to toggle the dropdown

`tailwindcss` Tailwind + Headless UI for the UI

`prisma` Prisma + Next.js API routes to fetch/store notifications

You fetch recent notifications from your database (via API) when the bell is clicked.

Or you load them on page load and just toggle visibility of the dropdown.

You mark them as read (optional) when the dropdown is opened or when each one is clicked.

You can use:

`useState` React state to toggle the dropdown

`tailwindcss` Tailwind + Headless UI for the UI

`prisma` Prisma + Next.js API routes to fetch/store notifications

You fetch recent notifications from your database (via API) when the bell is clicked.

Or you load them on page load and just toggle visibility of the dropdown.

You mark them as read (optional) when the dropdown is opened or when each one is clicked.

You can use:

`useState` React state to toggle the dropdown

`tailwindcss` Tailwind + Headless UI for the UI

`prisma` Prisma + Next.js API routes to fetch/store notifications

You fetch recent notifications from your database (via API) when the bell is clicked.

Or you load them on page load and just toggle visibility of the dropdown.

You mark them as read (optional) when the dropdown is opened or when each one is clicked.

Type	Reason
	<p>You can use:</p> <p>React state to toggle the dropdown</p> <p>Tailwind + Headless UI for the UI</p> <p>Prisma + Next.js API routes to fetch/store notifications</p>
